End of Life Information – Hot Water Cylinders & Thermal Stores

General

Grant hot water storage cylinders and thermal stores incorporate components manufactured from a variety of different materials. The majority of these materials can be recycled whilst the smaller remainder cannot.

Materials that cannot be recycled must be disposed of according to local regulations using appropriate waste collection and/or disposal services.

Disassembly

There is little risk to those involved in the disassembly of the cylinder or thermal store if the process is undertaken with care and reasonable precautions are taken.

Recycling

Many of the materials used in Grant hot water storage cylinders and thermal stores can be recycled, as listed below:

Component	Material
Shell	Stainless steel (duplex 2034)
Internal coils	Stainless steel
Compression connections	Brass
Outer casing	Steel (acrylic coated)
Top/bottom caps	ABS (acrylic capped)
T&P valve	Brass
Immersion heater	Brass/stainless steel
Dual thermostat	Plastic/copper

Disposal

All materials other than those listed above, e.g. insulation, must be disposed of responsibly as general waste.
